

PAVANI VALLEPU

+91 9392195900 | vallepupavani2005@gmail.com | [LinkedIn](#)

PROFILE

Aspiring Software Engineer with interest in Python, frontend development, and problem solving. Currently learning full stack development and building technical skills through projects and continuous learning.

EDUCATION

Bachelor of Technology in Computer Science Engineering Vignan's Nirula Institute of Technology and Science for Women, Guntur • CGPA: 8.68	2023 – 2027
Intermediate (Class XII) Sri Chaitanya Junior College, Narasaraopet • Percentage: 94.2%	2021 – 2023
SSC (Class X) Zilla Parishad High School, Chavitipalem	2021

EXPERIENCE

Purple Technologies (PTS) IoT Intern • Completed a 2-month internship focused on Internet of Things (IoT), gaining practical exposure to smart devices, automation systems, and real-time applications. • Worked on device integration and explored communication between hardware components while enhancing technical and problem-solving skills.	May 2025 – July 2025
--	----------------------

PROJECTS

- IoT Smart Water Quality Classifier** | *IoT, Machine Learning, Django*
- Developed an IoT system using TDS and turbidity sensors to monitor water quality in real time.
 - Implemented a machine learning model to classify water as safe or unsafe and trigger alerts using a buzzer.
 - Built a basic web dashboard using Django to display sensor readings and system status.
- Women Education and Employability (CSP Project)** | *Survey, Data Analysis*
- Conducted a community survey on women education and employability in rural and urban areas.
 - Collected and analyzed data to understand education access and employment challenges.

RESEARCH & PATENT

- Technical Analysis of Crop Production Prediction using Hybrid GRU and BiLSTM Model**
- Presented a research study on crop yield prediction using hybrid deep learning models (GRU and BiLSTM).
 - Analyzed agricultural data patterns to improve prediction accuracy using sequential learning techniques.
- Cloudy/Clear Weather Classification using Deep Learning with Cloud Images**
- Developed a deep learning-based classification system to detect cloudy and clear weather conditions using cloud image datasets.
 - Applied image processing and neural networks to improve weather classification accuracy.

TECHNICAL SKILLS

Programming Languages: C, python, HTML, CSS
Tools & Platforms: VS Code, GitHub, MS Office
Technical Concepts: IoT, Automation, Problem Solving, Analytical Thinking
Soft Skills: Quick Learner, Communication, Team Collaboration, Defect Identification

CERTIFICATIONS

- NPTEL – Human Computer Interaction (Silver Elite)
- NPTEL – Joy of Computing Using Python (Elite)
- Infosys Springboard – Basic Course Completion Certificates
- Wadhvani Foundation – Ignite India Program
